CONTENTS

P. O. Bell: Some applications of differential geometry to the interpretation of physical phenomena 321
R. Bellman: On a routing problem 88
R. Bellman, I. Cherry and G. M. Wing: A note on the numerical integration of a class of non-linear hyperbolic equations 181
R. Bellman: Some new techniques in the dynamic programming solution of variational problems 295
R. Bellman: On a generalization of a result of Wintner 428
R. I. Bernstein (*see K. S. Miller*)
L. E. Blumenson (*see K. S. Miller*)
W. Boyce and G. Handelman: Vibrations of twisted beams II 385
B. Budiansky: Extension of Michell's theorem to problems of plasticity and creep . 307
G. F. Carrier and C. T. Chang: On an initial value problem concerning Taylor instability of incompressible fluids 433
C. T. Chang (*see G. F. Carrier*)
I. Cherry (*see R. Bellman*)
P. Chirlian: Bounds on the error in the unit step response of a network 430
Tse-Sun Chow: On the solution of certain differential equations by characteristic function expansions 227
R. A. Clark: Asymptotic solutions of toroidal shell problems 47
R. N. D'Heedene: Simultaneous invariance of generalized spherical harmonics under the operations of two rotation groups 188
C. L. Dolph and D. C. Lewis: On the application of infinite systems of ordinary differential equations to perturbations of plane Poiseuille flow 97
R. M. Durstine and D. H. Shaffer: Determination of upper and lower bounds for solutions to linear differential equations 315
J. N. Franklin: On the equidistribution of pseudo-random numbers. 183
B. Garfinkel: On the motion of a simple pendulum 192
R. E. Gibson: A heat conduction problem involving a specified moving boundary 423
G. Handelman (*see W. Boyce*)
W. Hauser: Variational principles for guided electromagnetic waves in anisotropic materials 259
W. D. Hayes (*see C. S. Wu*)
P. G. Hodge, Jr. and R. Sankaranarayanan: On finite expansion of a hole in a thin infinite plate 73
Isao Imai: On the heat transfer to constant-property laminar boundary layer with power-function free-stream velocity and wall-temperature distributions . 33
M. J. Jacobson: The finite length partial fitted journal bearing with axial oil grove . 1
R. P. Kanwal: On curved shock waves in three-dimensional gas flows 361
P. Kaplan: Waves produced by a pulsating source travelling beneath a free surface 436
H. B. Keller: On some iterative methods for solving elliptic difference equations 209
E. V. Laitone: On the damped oscillations equation with variable coefficients . . 91
R. Latter: Approximate solutions for a class of integral equations 21

D. C. Lewis (*see C. L. Dolph*)
M. Lotkin: Experiments in the smoothing of data 169
S. H. Maslen: Transverse velocities in fully developed flows 173
K. S. Miller, R. I. Bernstein and L. E. Blumenson: Generalized Rayleigh processes . 137
W. L. Miranker: A free boundary value problem for the heat equations 121
L. G. Napolitano: The Blasius equations with three-point boundary conditions . . 397
G. F. Newell: Some statistical problems encountered in a theory of pinning and break away of dislocations 155
L. E. Payne: Inequalities for eigenvalues of supported and free plates. 111
C. R. Putnam: On the first stability interval of the Hill equation. 418
W. P. Reid: Heat flow in a cylinder 147
R. E. Roberson: Air drag effect on a satellite orbit described by difference equations in the revolution number 131
A. L. Ruoff: An alternate solution of Stefan's problem 197
R. Sankaranarayanan (*see P. G. Hodge, Jr.*)
W. Schumann: On limit analysis of plates 61
W, Schumann: On isoperimetric inequalities in plasticity 309
D. H. Shaffer (*see R. M. Durstine*)
M. Shinbrot: A generalization of Latta's method for the solution of integral equations 412
J. S. Shipman (*see R. L. Sternberg*)
I. N. Sneddon: Note on a paper by J. R. M. Radok 197
R. L. Sternberg, J. S. Shipman and S. R. Zohn: Multiple Fourier analysis in rectifier problems 335
Lu Ting: Some integrated properties of solutions of the wave equation with non-planar boundaries 373
V. Vodicka: A class of problems on longitudinal vibrations 11
V. H. Weston: Toroidal wave functions 237
G. M. Wing (*see R. Bellman*)
A. Wintner: The Schwarzian derivative and the approximation method of Brillouin. 82
A. Wintner: On an inequality of Liapounoff 175
A. Wintner: A stability criterion for quasi-harmonic vibrations 420
C. S. Wu and W. D. Hayes: Crocco's vorticity law in a non-uniform material . . 81
Chia-Shun Yih: Maximum speed in steady subsonic flows 178
Chia-Shun Yih: Effects of gravitational or electromagnetic fields on fluid motion . 406
A. H. Zemanian: On transfer functions and transients 273
S. R. Zohn (*see R. L. Sternberg*)
BOOK REVIEWS . 20, 32, 46, 72, 94, 146, 154, 202, 236, 258, 306, 318, 334, 396, 441
